

Exercise 1:

...

Feature Maps - Conv1

Feature Maps - Conv2

```
def visualize_feature_maps(model, loader):  
    model.eval()  
    dataiter = iter(loader)  
    images, labels = next(dataiter)  
    image = images[0].unsqueeze(0).to(device) # يک تصویر
```

خروجی لایه اول #

```
with torch.no_grad():
    conv1_out = model.conv1(image)      # خروجی convolution 1
    conv1_act = F.relu(conv1_out)       # فعالسازی
    conv2_out = model.conv2(model.pool(conv1_act))
    conv2_act = F.relu(conv2_out)
```

--- های لایه اول Feature Map نمایش # ----

```
fig = plt.figure(figsize=(12, 4))
fig.suptitle("Feature Maps - Conv1", fontsize=16)
for i in range(conv1_act.shape[1]):
    plt.subplot(2, 4, i+1)
    plt.imshow(conv1_act[0, i].cpu(), cmap="gray")
    plt.axis("off")
plt.show()
```

--- های لایه دوم Feature Map نمایش # ----

```
fig = plt.figure(figsize=(12, 6))
fig.suptitle("Feature Maps - Conv2", fontsize=16)
for i in range(8): # فقط 8 تا برای زیبایی
    plt.subplot(2, 4, i+1)
    plt.imshow(conv2_act[0, i].cpu(), cmap="gray")
    plt.axis("off")
plt.show()
```

```
visualize_feature_maps(model, train_loader)
```
